

# Klaes assembly planning

Optimally plan window and door orders for installation with just one click

Link your orders directly with the planning of the assemblies - the Klaes assembly planning makes it possible! With just a few clicks you can plan your orders with your existing resources and thus have all important information for your daily business in view at any time. In the order pool of Klaes assembly planning you always have a complete overview of all documents to be scheduled. Existing business partner information and item details can already be viewed during planning.

You can easily add necessary documents to the assembly date by drag & drop. Clear status management and a distinctive free-text search enable you to easily schedule documents for available free resources. Of course, you can reschedule an already scheduled document later in no time at all. A simple master data system enables you to introduce Klaes assembly planning quickly and easily into your company.
